

Research officer positions are available at A\*STAR Laboratory for Multiscale Molecular Diagnostics. Our research group focuses on creating innovative technologies to empower molecular diagnostics and patient care. A highly diverse team, our multidisciplinary interests and expertise span the field of **molecular biology**, **nanomaterials chemistry** and **device engineering**. With a common vision of addressing real-world unmet biomedical challenges, we place a strong emphasis on innovation, integration and translation to develop new generations of micro- and nanoscale technologies. Please visit our lab website to find out more (<http://www.imcb.a-star.edu.sg/php/iif-hs.php>)

Applicants should have a strong undergraduate degree in a relevant Science/Engineering discipline. Successful candidates must be interested in translational research, highly motivated, and able to work in an interdisciplinary environment.

Requirements:

B.Sc. or B.Eng. from a well-recognized institution.

Excellent analytical, technical and problem solving skills.

Excellent organizational skills.

Committed and motivated.

Previous research experience in related areas will be desirable.

Interested candidates should send a cover letter, CV, transcripts and the names and contact information of two references to Dr. Huilin SHAO ([hshao@imcb.a-star.edu.sg](mailto:hshao@imcb.a-star.edu.sg)).

Only shortlisted candidates will be notified.
