Overseas Entrepreneurship Programme
Undergraduates who opt not to do a Final Year Project can apply for the Overseas Entrepreneurship Programme (OEP). The OEP allows entrepreneurially inclined students to intern at a startup company, so as to experience the process and challenges that entrepreneurs face in building and growing their companies. The startup company is located in major global innovation hubs such as Silicon Valley, New York, Shanghai and Berlin. When travel restrictions are in place, students can work remotely in Singapore for the overseas startup company. Students can also opt to work for a startup company that is based in Singapore, but with ambitions to grow their business globally.
Students can apply for the OEP [here](#). The OEP course outline can be found [here](#).
