

### **Lone Working**

All personnel are not permitted to do laboratory work alone. This means that there must be another person present in the laboratory and the second person must be in the same room.

Personnel shall be considered as working alone if nobody is able to see him/her

Furthermore, for undergraduate researchers, the second person present must be of higher status. i.e. not another undergraduate, but a graduate student, post doctorate, research associate or faculty member.

The second person must have had attended the necessary safety training conducted by the School (use of fire extinguisher, safety shower etc.)
